

# monitor.ID

## Keeping track of your production line's performance

# Keep track of your production line's performance

monitor.ID helps you monitor your product identification hardware\* – with data analytics and critical system alerts. The result: increased transparency, increased efficiency and a reduction of costs, from product to pallet identification.

## See what's going on

### Never miss a beat

An individual PID hardware view offers a comprehensive overview of the performance.

### Up & Downtime

A data-driven analysis provides transparency on PID hardware up and down time.

### Machine history

A status bar displays the process status over a specific period of time, providing a clear and comprehensive overview.

### Maintenance overview

A maintenance plan with a timeline and a maintenance indicator can help minimize downtime.

\* monitor.ID currently covers compatible hardware from the following PID companies: Logopak, Etipack, NOVEXX, EIDOS, LSS

## Status and long-term performance overview

The intuitive and user-based dashboard allows users to quickly access the information they need without navigating through multiple screens. For improved clarity it is grouped into two layers:

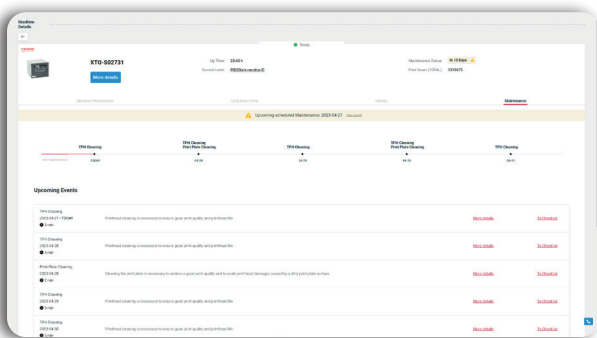

Per location

Per production line

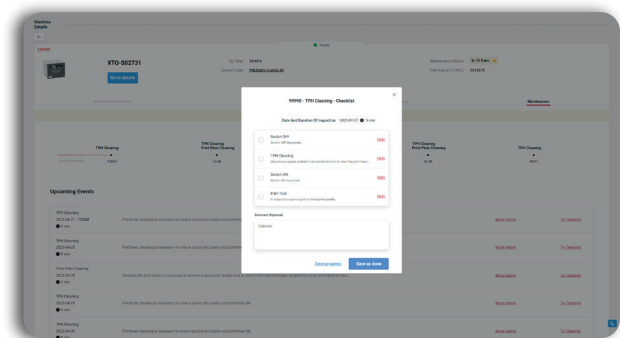

## Take better care of your machines & reduce downtimes

### Maintenance management

A maintenance countdown display and a timeline showing when the next maintenance is due not only ensure that you don't miss any maintenance, you can also coordinate your production schedule with maintenance cycles to avoid unplanned downtime.

### Maintenance levels

Our experts have defined 3 maintenance levels with detailed checklists:

- 1. Operator:** Basic actions to maintain the PID Hardware in optimal condition.
- 2. Technical:** Advanced checks for technical personnel.
- 3. PID Expert:** More advanced tasks for PID experts to maintain the hardware.

## Get in touch

You already have a contact person at one of the PID companies? Feel free to contact them directly. Besides that, we are happy to direct you to the respective team member, according to your product identification needs:
